## CAREER OBJECTIVE

Software developer focused on writing readable and maintainable code to develop software that solves complex problem and meet the needs of users. I enjoy working closely with team members to ensure tasks are done effectively and efficiently. Passionate about personal growth and self-development with the ability to learn fast.

## RELEVANT EXPERIENCE

### PROJECTS

**A Task Management App**

- I built a full stack MERN app that allows sign up, login, login with google to manage tasks. User can create, read, update and delete boards and tasks, mark subtasks as done, receive form validation when trying to create/edit board and tasks, hide/show sidebar, toggle between light/dark modes

**Entertainment Movie App**

- I built an app that displays trending, popular, top rated, top grossing, airing movies and TV series to the user, it allow user search for any movie or TV Series, it also allow user to search for movie or TV series by genre. User can also get full details of each movie or series

**Full Stack TODO App**

- I built an app that allow user to register, login, logout add new todos, mark todos as complete, delete todos, filter todo by all/active/complete, clear all completed todos, also with a light and dark mode.

**IP Address Tracker**

- I built an app that allows user to see their own IP Address on a map on initial page load, user can also search for any IP Address or domain and see information such as location, internet service provider and time zone.

**URL Shortening Website**

- I built a webpage that allow user to create shortened URLs for an valid URL, the user is able to see a list of shortened URL even after refreshing the browser, user can also copy the shortened link to their clipboard in a single click

**E-Commerce Product Page**

- I built an ecommerce webpage consisting of a lightbox gallery which can be opened by clicking on a large product, the large product can be switched by clicking on small thumbnails images, user can also add item to cart, view cart and remove item from cart.
